PROJECTS

Your Bnb Javascript, Redux, PostgreSQL, HTML, CSS, React, Sequelize

[live](#) | [github](#)

Your Bnb is an Airbnb inspired application that allows users to bnb their homes, make reservations, and leave reviews at the homes they've stayed.

- Implemented Object Relational Mapping with Sequelize to interact with the PostgreSQL Database.
- Developed and executed tests using Postman to create and resolve problems pertaining to the endpoints.
- Utilized NPM packages to implement calendar functionality, allowing users to choose dates when creating a reservation.
- Developed functionality in the backend to allow uploading the links of the images the user would like to post.

Tunespace React, Redux, Flask, SQLAlchemy, AWS S3, PostgreSQL, Python, Javascript

[live](#) | [github](#)

A music streaming web application where users can upload music, listen to music, create comments on songs and like songs.

- Collaborated with 3 other developers to design, develop, and deploy a full stack web application.
- Participated in daily standup meetings to coordinate productivity and time management more effectively to meet daily goals set by the team.
- Utilized Github and Git to manage project code and to create seamless collaboration and coordination between team members.

Dumblr React, Redux, Flask, SQLAlchemy, AWS S3, PostgreSQL, Python, Javascript

[live](#) | [github](#)

Dumblr is a web application inspired by Tumblr and The Office. Users are able to create posts, create comments, follow others, and like other posts.

- Designed a Redux store to improve code maintainability, code performance, and to manage the state of the application.
- Conducted extensive testing using the Redux and React DevTools on chrome to help manage the state and resolve bugs effectively.
- Implemented AWS S3 so that users are able to upload images from their devices.
- Managed the applications database using SQLAlchemy to ensure an efficient way to store and retrieve data.

EXPERIENCE

Sales Floor Associate

Walmart

Oct 2017 - Oct 2019

- Adapted to changing priorities and timelines to ensure projects were completed on schedule.
- Demonstrated a positive attitude and willingness to assist customers and team members in all areas of the store, including customer service, inventory management, and sales support.
- Used analytical thinking to identify trends and opportunities for process improvement in store operations.
- Leveraged technology to support store operations, including inventory management systems and point-of-sale systems.

EDUCATION

Software Engineering - App Academy | Fall 2022 - winter 2023

- Learned Languages and Frameworks like Python and Express.js

Computer Science - Long Beach City College | Winter 2021 - Spring 2022

- Completed courses in Python and C++
